

# Sustainability:

Meeting the needs of the present without compromising the ability of future generations to meet their own needs.

## Reusable To-Go Containers Reduce Waste

These days everyone wants to eat on the run. While the absolute best way for you to save resources is to slow down and to stay right in the dining center for your meal, we know that is not always possible. So, we provide the meals-to-go program. Over the years this program has grown so large that we have used **almost 1/2 million foam containers per year!** To reduce this waste we have changed the program.

- See the checker for one free reusable container.
- Bring it back the next time you want a meal-to-go.
- We will exchange it for a clean container that has been washed in our high powered, super sanitizing washer.
- If you lose your container, a replacement will cost \$3.
- This will cut down on waste immensely.
- Thank you for your cooperation.
- **Think Green!**
