

Sustainability:

Meeting the needs of the present without compromising the ability of future generations to meet their own needs.

If you are on a meal plan you received a reusable bottle at the beginning of the year. Using this bottle to take a drink to go continues to save thousands of pounds in waste from soda and juice containers.

Consider using your reusable bottle to fill from the tap to save more resources. While water bottles may be recycled, often they are not. They end up in the garbage, on our roads, and even our oceans! Plus, it takes 1.5 million barrels of oil per year to produce bottled water.

SUFS is giving you this tool to help save energy and reduce waste.
